

SPECIFICATION AMENDMENTS

Please insert a section of "BRIEF DESCRIPTIONS OF DRAWINGS" after the second paragraph and immediately before the section heading "DETAILED DESCRIPTION OF PREFERRED EMBODIMENTS" on page 5 as follows:

BRIEF DESCRIPTIONS OF DRAWINGS

Figure 1 schematically illustrates a sectional view of a contact lens comprises molecular imprints for an analyte of interest distributed therein according to a preferred embodiment of the invention.

Please amend the first paragraph on page 17 as follows:

In accordance with another preferred embodiment of the invention, a contact lens of the invention comprises molecular imprints for the analyte of interest. For example, as shown in Figure 1, a contact lens 1 having a concave surface 11 and a convex surface 12 can be made from a polymerizable composition comprising an analyte of interest. After curing the polymerizable composition, the analyte of interest can be extracted out to provide molecular imprints 105 for the analyte of interest in the contact lens.
